

EMILIA SOLIS

STUDENT

SCHOOL

ACADEMIC INSTITUTION

Name: Luis de Jesús Cordero School
Location: Cuenca, Azuay Province, Ecuador

ACADEMIC EXPERIENCE

The institution has provided high-quality education, with qualified teachers who have fostered both academic growth and personal development for students.

SCHOOL LIFE STAGES

- **Kindergarten (2015-2016):** Where social skills, creativity, and a love for learning were developed through dynamic and participatory activities. I learned to fill spaces with crepe paper, which helped my creativity and ability to learn to write.
- **1st to 7th Grade Basic Education (2017-2023):** Fundamental knowledge was built in mathematics, language, science, and social studies. I learned to make friends, write, and have stories to tell. It wasn't just about good grades, but about loving what you do and learning with sincerity.
- **8th to 9th Grade Basic Education (2024-2026):** Previous subjects were expanded upon, and new courses like Robotics and Art were introduced to enhance the student's competencies. I learned new things, had new subjects added, learned to push myself more, and learned that it's not all laughs, but not all studies either. It's about finding a balance and preparing for future challenges.

HOBBIES

The main hobby is crafting, an activity that combines creativity, patience, and manual dexterity.

MATERIALS USED

- **Cardboard:** Used to build structures, decorative figures, and practical objects, taking advantage of its versatility and easy accessibility.
- **Pipe Cleaners:** Ideal for shaping small details, creating flowers, animals, and decorative elements due to their flexibility.
- **Flowers (natural or artificial):** Integrated into decorative arrangements, personalized cards, and unique pieces, adding color and a natural touch to each creation.

INTEREST

COOKING

This interest combines creativity and practicality. I enjoy exploring recipes from different cultures, experimenting with typical ingredients, and learning cooking techniques. Cooking is also valued as a way to bring family and friends together.

TRAVEL

I seek to discover new destinations, cultures, traditions, and landscapes both within Ecuador and abroad. Travel is an opportunity to expand knowledge, learn about different ways of life, try local foods, and connect with people from diverse backgrounds.

MEDICINE

There is strong interest in the health field, especially in understanding how the human body works, preventing illness, and contributing to people's well-being. I keep up with medical advances, and value the work of healthcare professionals. I also aim to learn about basic care and first aid.

EARNING MONEY

It is important to develop skills to generate income in an honest and sustainable way. The goal is to achieve financial independence while doing what I enjoy, as well as contributing to Cuenca's local economic development.

EXTRA CURRICULAR ACTIVITIES

EXTRACURRICULAR ACTIVITIES

- **Cedei:** An educational center focused on immersive English language learning, helping individuals achieve native-level through interactive and practical methods.
- **Music:** Began musical training at age 9, developing skills in both piano and transverse flute. Continuing to refine technique and explore diverse musical genres.
- **Mathematics:** Three years of dedicated study, expanding knowledge of mathematical principles, like problem-solving strategies.
- **Physics:** Two years of exploring fundamental concepts such as motion, acceleration, forces, and energy.
- **Robotics:** Participated in an intensive one-week course focused on operating 3D printing machines and creating various designs, gaining hands-on experience in digital design and fabrication.
- **Mecatronics:** Developed a passion for automobiles, learning to design and fabricate custom parts, demonstrating creativity and technical aptitude.
- **Pets:** Responsible pet owner, providing care and attention to 4 cats (2 female and 2 male) and a 9-year-old dog, demonstrating responsibility and compassion.
